OUR
SERVICES

CCTV Systems

For high quality CCTV installations in the Maharashtra, call an Rakshak. Our many years of experience in the industry has resulted in us becoming the Maharashtra premier security camera installers, carrying out services across Mumbai, Pune, Nashik, Nagpur, Dhule, Jalna, Nandurbar, Beed, Osmanabad, Satara, Sangali, Solapur etc.

With years of experience in designing, installing and commissioning CCTV systems for domestic and commercial customers, the fully qualified and equipped team call "rakshak" is on hand to customize a monitoring solution that suits your exact needs. With wireless CCTV systems and free remote monitoring internet connection available, you can be sure that with us your home or company is in the best possible hands.

We have implemented CCTV in a number of companies, including councils, post offices, race courses, universities, supermarkets, shopping environments and many more.

Entrance Management System:

Our experience allows us to use a qualitative variety of Entrance Management System to operate. Most of these are used in institutes, offices and businesses, these attendance systems are highly requested and are renowned for some exclusive features.

The manufacturers use materials of superior quality and innovative technology to produce these devices, taking into account the international quality standards. To order to meet the varied requirements of employers, the system provided is available to various provisions.

Gate Management Solution aim is to create a safe environment. GMS monitors any forced entry into a corporate lobby, a restaurant, an entertainment area, an industrial area or a subway station. Beginning with simple Tripod Turnstiles, GMS can advance Entrance Gates such as Full-Height Turnstiles, Blocking Bollards, Spike Barrier, Wedge Barrier, Road Blockers, Speed Gates and Security Doors. They can be integrated with Access Control, CCTV (IP & Analog), Burglary and Fire System. It also offers physical protection against ballistic and explosive attacks at high performance.

Features:

- Effective functioning
- Longer service life
- Durability

Electronics Article Survilliance System:

Systems for electronic article tracking (EAS) help prevent retail theft. While these types of solutions can scare off shoplifters, it is important for retailers not to present a consumer obstacle. Elektra offers a wide range of EAS solutions offering a positive shopping experience and maximum product protection.

Alarm systems for electronic article surveillance (EAS) are triggered when someone leaves a store or building with a product attached to it with an active tag or label. EAS systems are often used to prevent theft of valuable properties from e.g. public buildings in stores or shoplifting. Many types of solutions for EAS are available.

- AM (acoustic-magnetic) systems
- RF (radio frequency) systems
- Systems combined with RFID
- Systems that are RFID-ready
- RFID only

Need any advice or are you interested in finding out more? Please feel free to download or contact our EAS catalogue.

Home Automation System:

Home automation is a mini residential building automation solution that includes lighting, heating, ventilation, air conditioning and security control, as well as home appliances such as washing machines, ovens or refrigerators that use Wi-Fi to monitor remotely.

Modern systems generally consist of switches and sensors connected to a central hub sometimes called a "Gateway" from which the system is controlled with a user interface that interacts with either a wall-mounted terminal, mobile phone software, tablet computer or web interface, often but not always via internet cloud services.

Hotel room energy management is the practice of monitoring processes, procedures and equipment... Detect occupancy to monitor heating, ventilation and air conditioning (HVAC) systems when you forget to turn off when you leave your house. Turning off the lights when smart lighting is not occupied in a room.

Electrical Wiring and lightning

We provide supply, installation, testing and commissioning of all ducts and hardware, plumbing, switches, socket outlets, spur outlets, junction boxes / pull boxes, GI pull wires, ceiling roses making connections etc. with distribution, installation, testing and commissioning. Copper conductor wires mounted in heavy gage steel galvanized conduits shall consist of PVC-insulated wires, unless otherwise stated.

Access Control
Systems

Access control systems are the most cost-effective way to manage who can enter and exit a defined area. Businesses will greatly reduce the risks associated with property loss and employee safety by incorporating these devices at the entrances of a building as well as restricted areas. By using a wide range of readers, key fobs and key cards, ESS can install a new system or connect to a current system.

We offer a broad range of access control options including: self-hosted systems, web-hosted solutions, managed control center, server-based system, offline / passive system, gate systems, turn still systems, visitor management system, and much more.

GPS Solution:

Our company provides advanced tools for mobile tracking and monitoring. We have complete solutions for real-time GPS and satellite tracking and monitoring, including both software and hardware solutions. Fleet management and vehicle safety applications, personal tracking, naval and air cargo, merchandise tracking, tracking and management of containers are among our solutions. Our online and mobile apps provide a comprehensive solution that monitors all units in one location.

Wireless alarm Systems

- 99 zones and 8 zone types optional in each zone
- Read RFID card to disarm, can learn 20 cards
- Color display with Humanized menu
- Simple operation with voice prompt, very easy to use
- 2 wired zones, Open and Closed Alarm mode optional
