MASTERSTONE

Infrastructure | Cyber Security | Automation

MASTERSTONE LLP

Vision

To be a leader in introducing cutting edge, niche technology in the IT infrastructure and cybersecurity space by exploring and discovering such technology providers and bringing them to the fore with the help of our distribution network. Thus, being a conduit for futuristic technology transfer.

Mission

To be focused on understanding the ever-evolving customer needs and thereby recommending them technological advancements to increase productivity with reduced IT infrastructure costs and increased automation with a balanced and forward-looking security outlook.

Value

To ensure transparency and Integrity of the highest standards towards our clients and alliance partners.

Our Business

MASTERSTONE is a Limited Liability Partnership in the Systems Integration business with a focus on providing Information Lifecycle Management, Cyber Security and Automation Solutions. Our Business solutions are offered across industries including the BFSI, Manufacturing, FMCG, Gems and Jewellery, Hospitality, Automobiles, etc.

Automation

Efficiency Unlocked! Errors minimized!

Robotic process automation helps you to automate tasks and processes which are repetitive and common in nature. There by increasing disposable time for other tasks with your employees and reducing human errors.

Cloud And Automation Management

- Server Automation
- Network Automation
- Client Automation
- Database & Middleware Automation
- Cloud Service Automation
- Datacenter Automation

Business Service Management

- Server Management
- Network Management
- Storage Management
- Application Performance Management
- Log Analytics
- Datacenter Automation
- IT Operations Predictive Analysis
- Operations Management

Service Portfolio Management

- IT Asset Management
- IT Inventory Management
- IT Service Management
- Application Dependency Mapping
- Project Portfolio Management

Cybersecurity

Find and Neutralize Threats!

Secure your business infrastructure from insider threat, zero-day malwares, AI based, IOT based attacks, unknown threats, data loss, supply chain risk and long-term infrastructure vulnerabilities etc. through a self-learning technology, which uses Machine learning and Artificial Intelligence to detect and respond to threats across the entire digital infrastructure including cloud, email, IoT, networks, SaaS, and industrial systems.

Perimeter

- Next Generation Firewall
- Intrusion Prevention System (IPS)
- Proxy and Content Filters
- Email Security
- SSL VPN
- DDOS

End Point

- End Point Protection- PC/ Mobile/ Tablets
- Patch Management
- Privileged Identity management (PIM)
- Virtual Patching Solutions
- Network Access Control
- Vulnerability Management Solutions

Data Security Solutions

- Data Loss Prevention
- Information Rights Management
- Web Application Firewall (WAF)
- Mobile Device Management (MDM)
- Two Factor Authentication (2FA) Encryption

Advanced Solutions

- Advanced Persistent Threat (APT) Defense
- Cyber Security Incident and Event Management (SIEM)
- Change Control and Audit/Compliance Monitors
- Cloud Access Security Brokers (CASB)
- DNS Security
- Threat Hunting

Information Lifecycle Management

Complexity and cost of legacy IT is a thing of the past. Converge not just technologies but also infrastructure and teams.

- Virtualization
- Enterprise Servers
- Networking
- Data Protection
- Storage
- Cloud Offerings
